

ROUND YOUR CORNERS

INSTRUCTIONS FOR BRINGING THIS INSTALLATION INTO YOUR SPACE

SUPPLY LIST

**Paint Matching the Original Color
and Finish of Your Wall**

Flat White Paint

Enough to paint the lower half of
your wall at least twice

**Flat Paint Matching the Color of
the Floor in Your Space**

Three Roller Sleeves

One for each color

One Roller Handle

One for each color

Three Large Brushes

1" to 2" in width - One for each color

Three Small Brushes

Not to exceed 1/2" in width
One for each color

One Smooth Wall

One Straight Edge

One Chalk Snap-Line

For lines that exceed the length
of your straight edge

One Roll of Blue Tape

One Soft Graphite Pencil

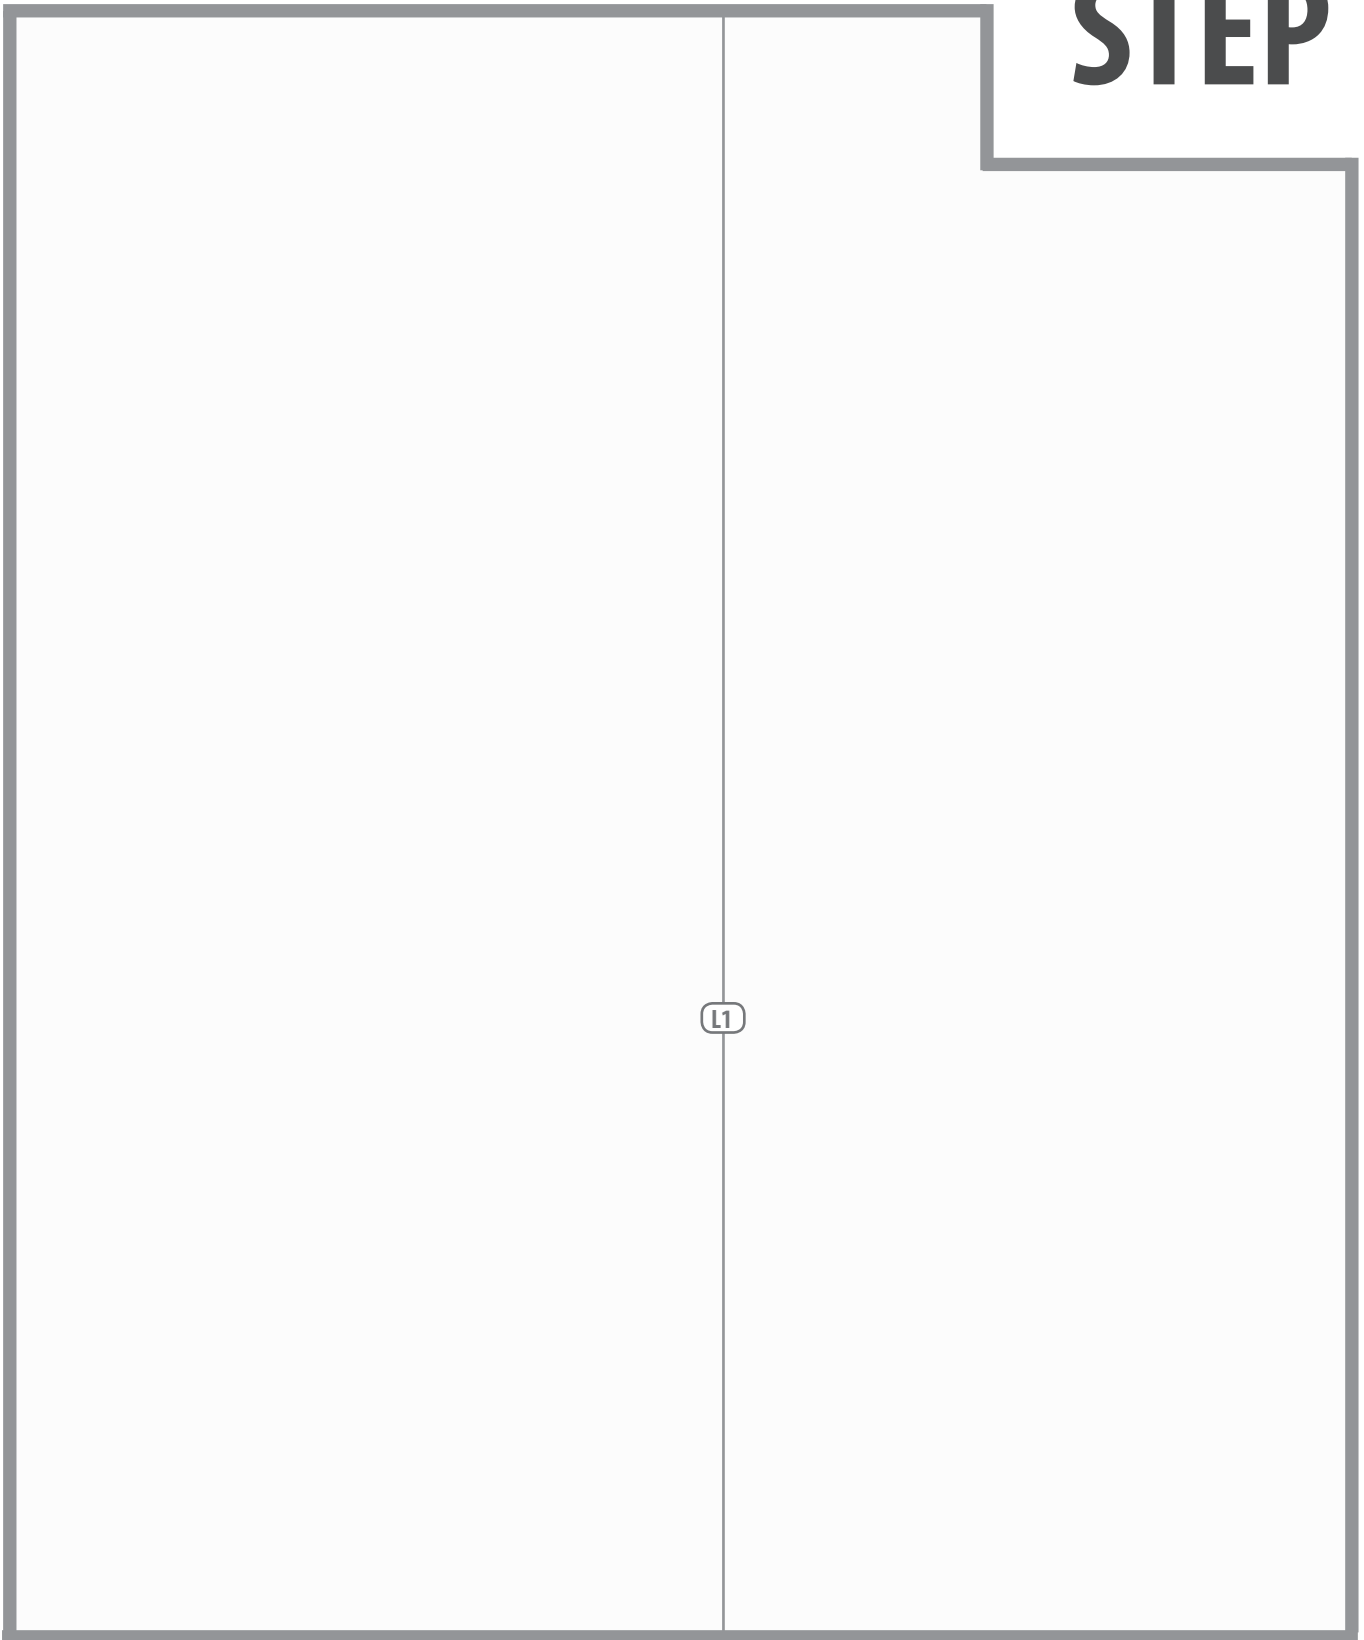

One Hard Graphite Pencil

One Malleable Eraser

One Solid Eraser

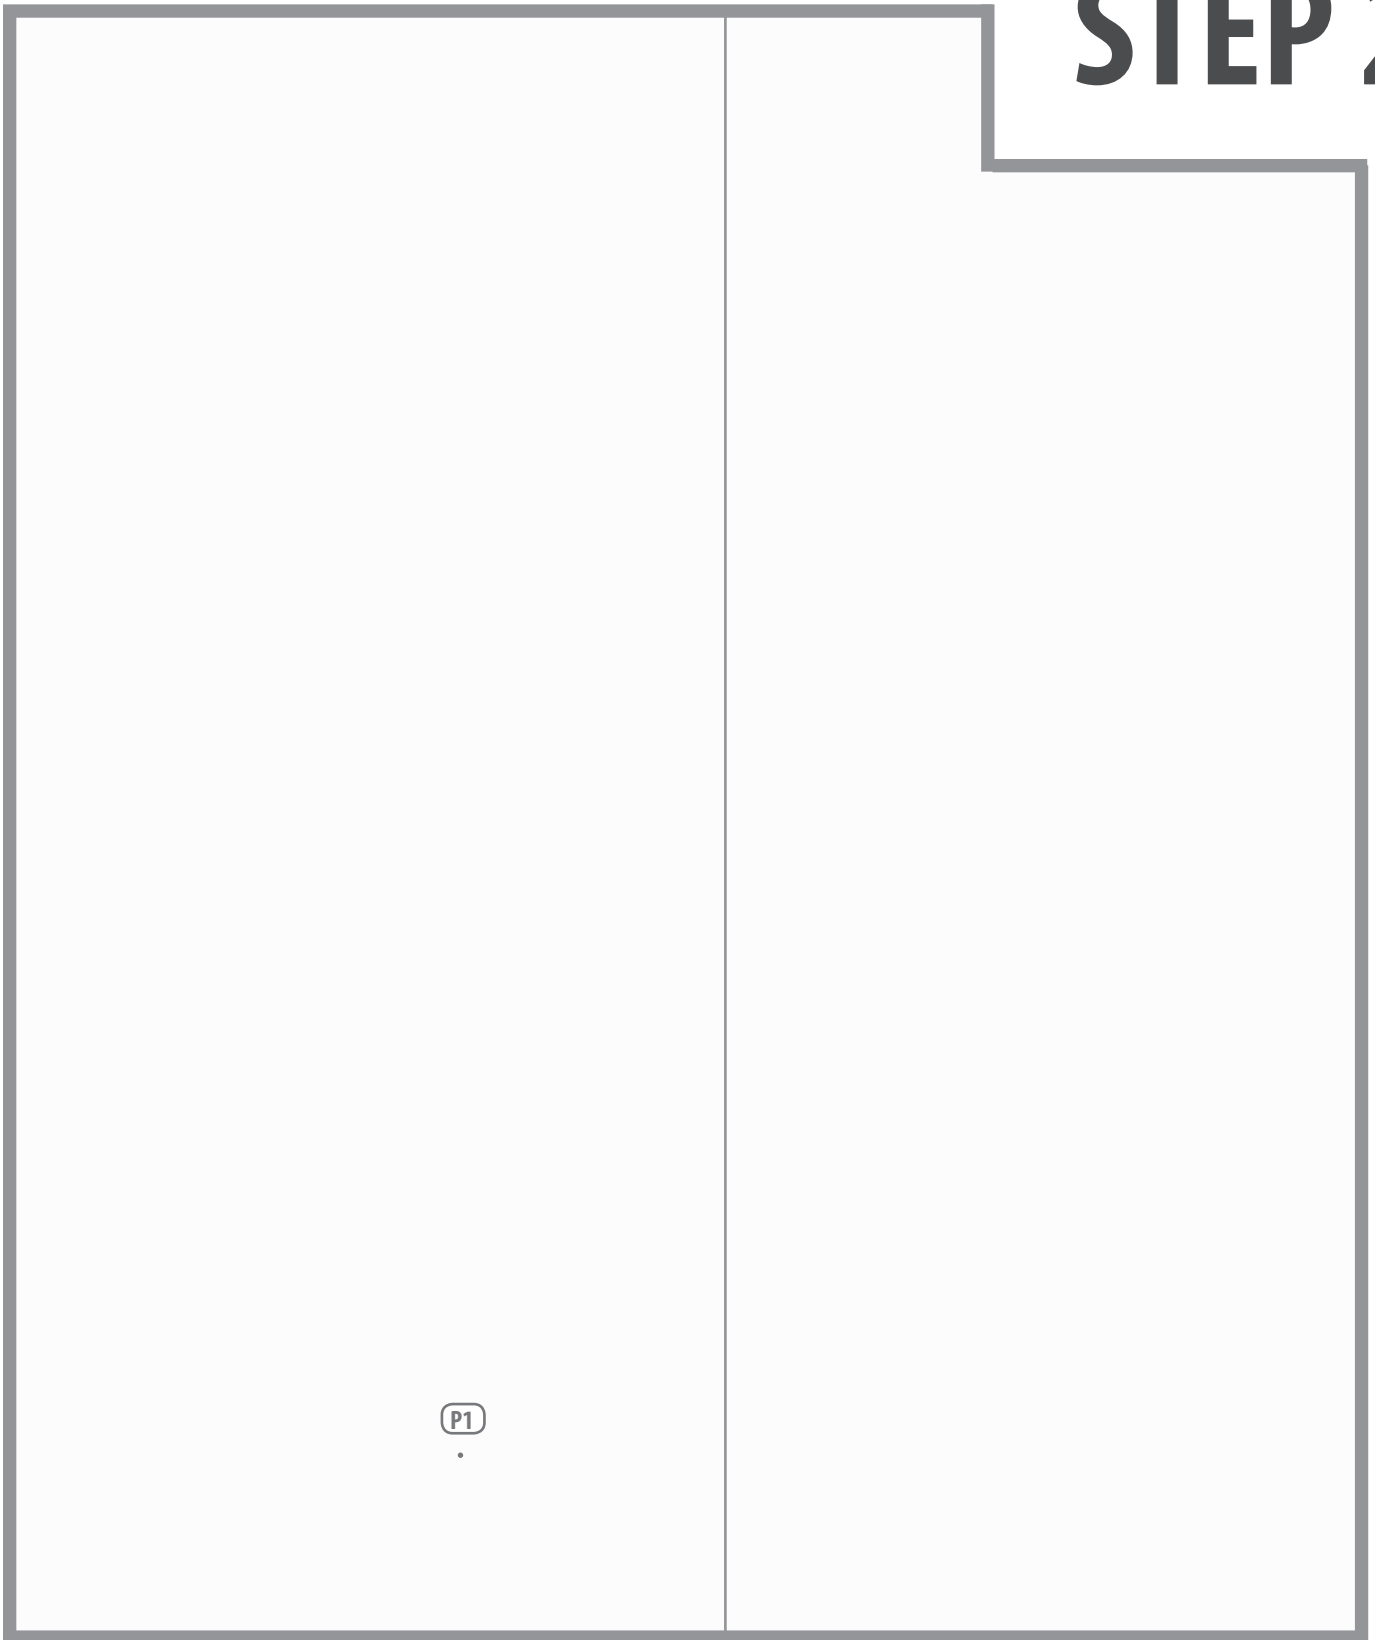

One Pencil Sharpener

STEP 1

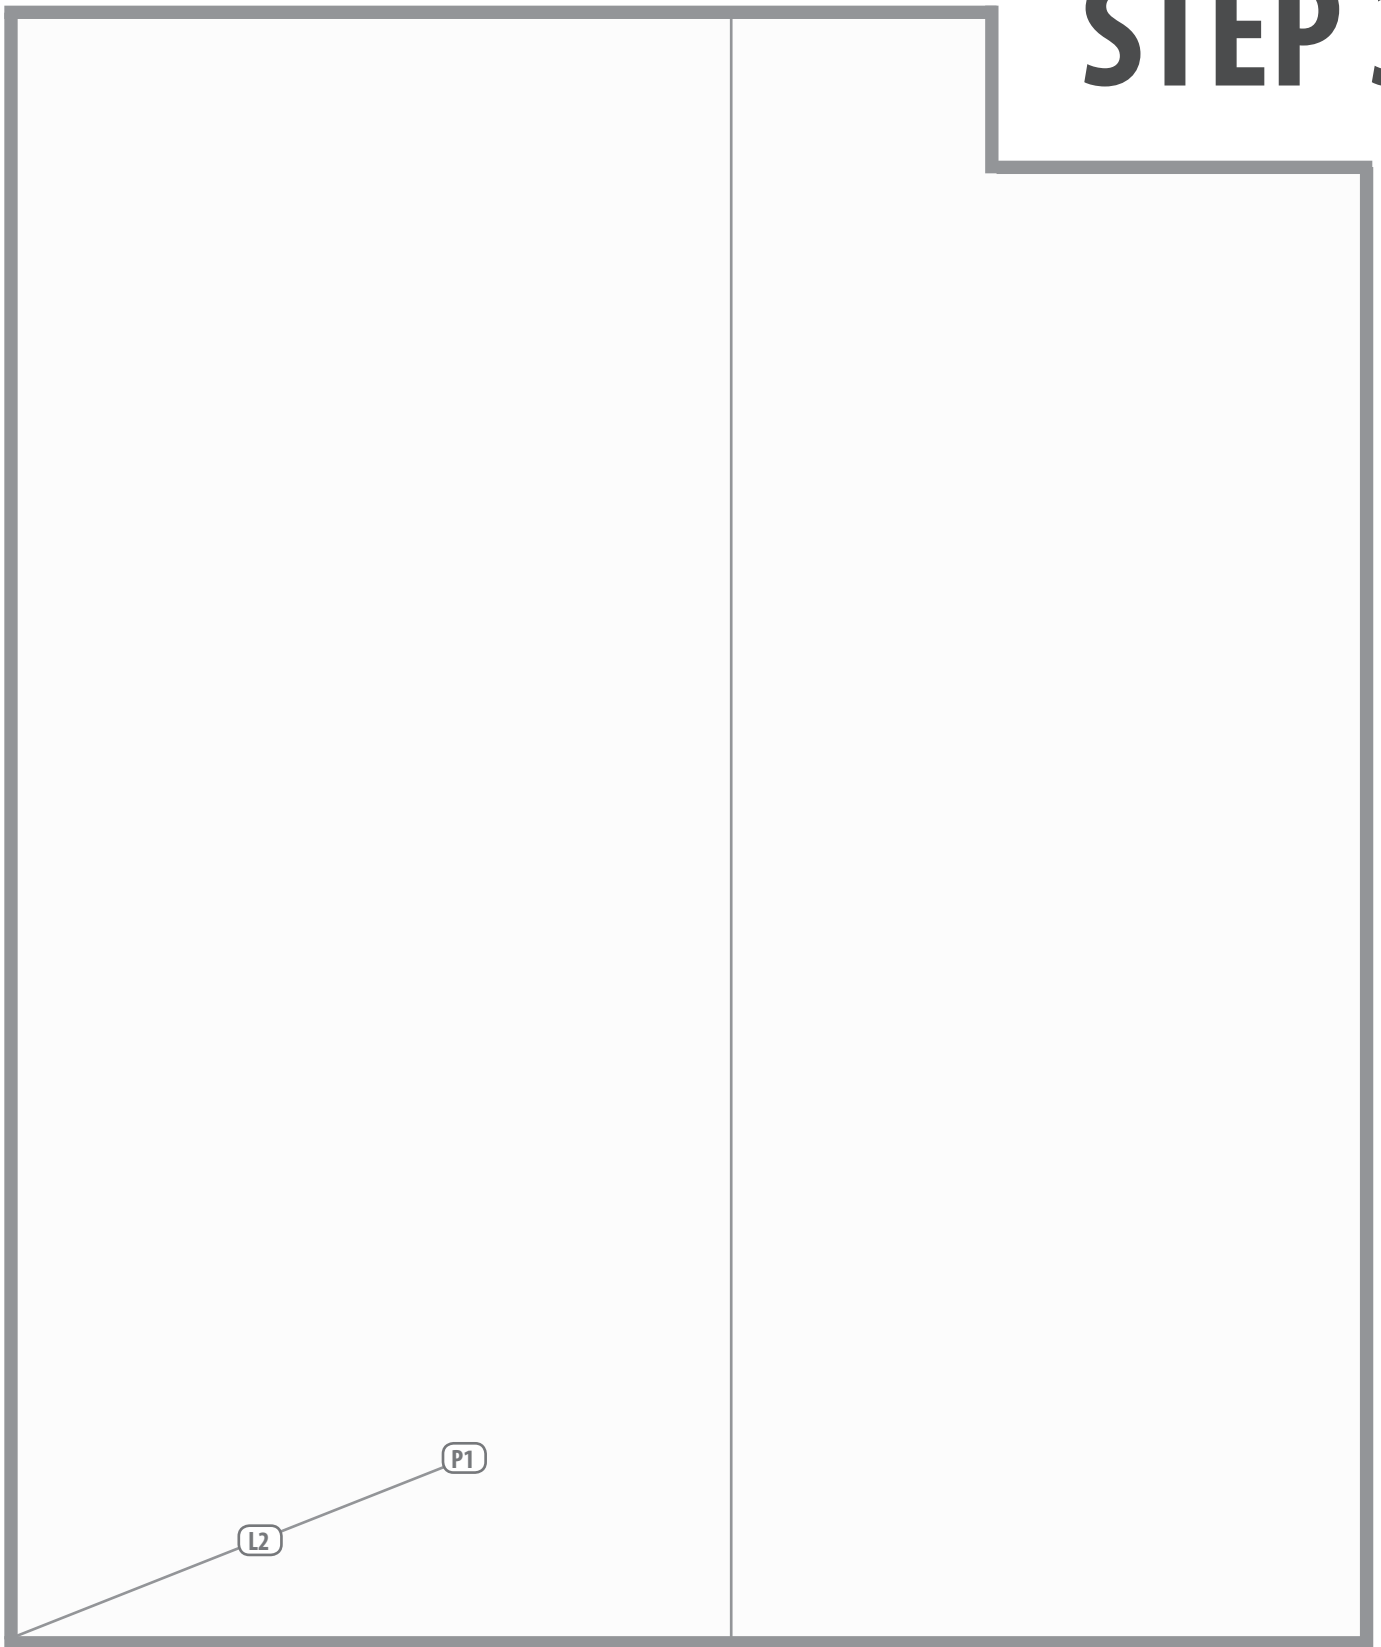

Using your hard graphite pencil or snap line, draw a line parallel to the left corner of your wall, beginning from the top of your wall at a distance from the left edge equivalent to $\frac{2}{5}$ the height of your wall.
Label that line L1.

STEP 2

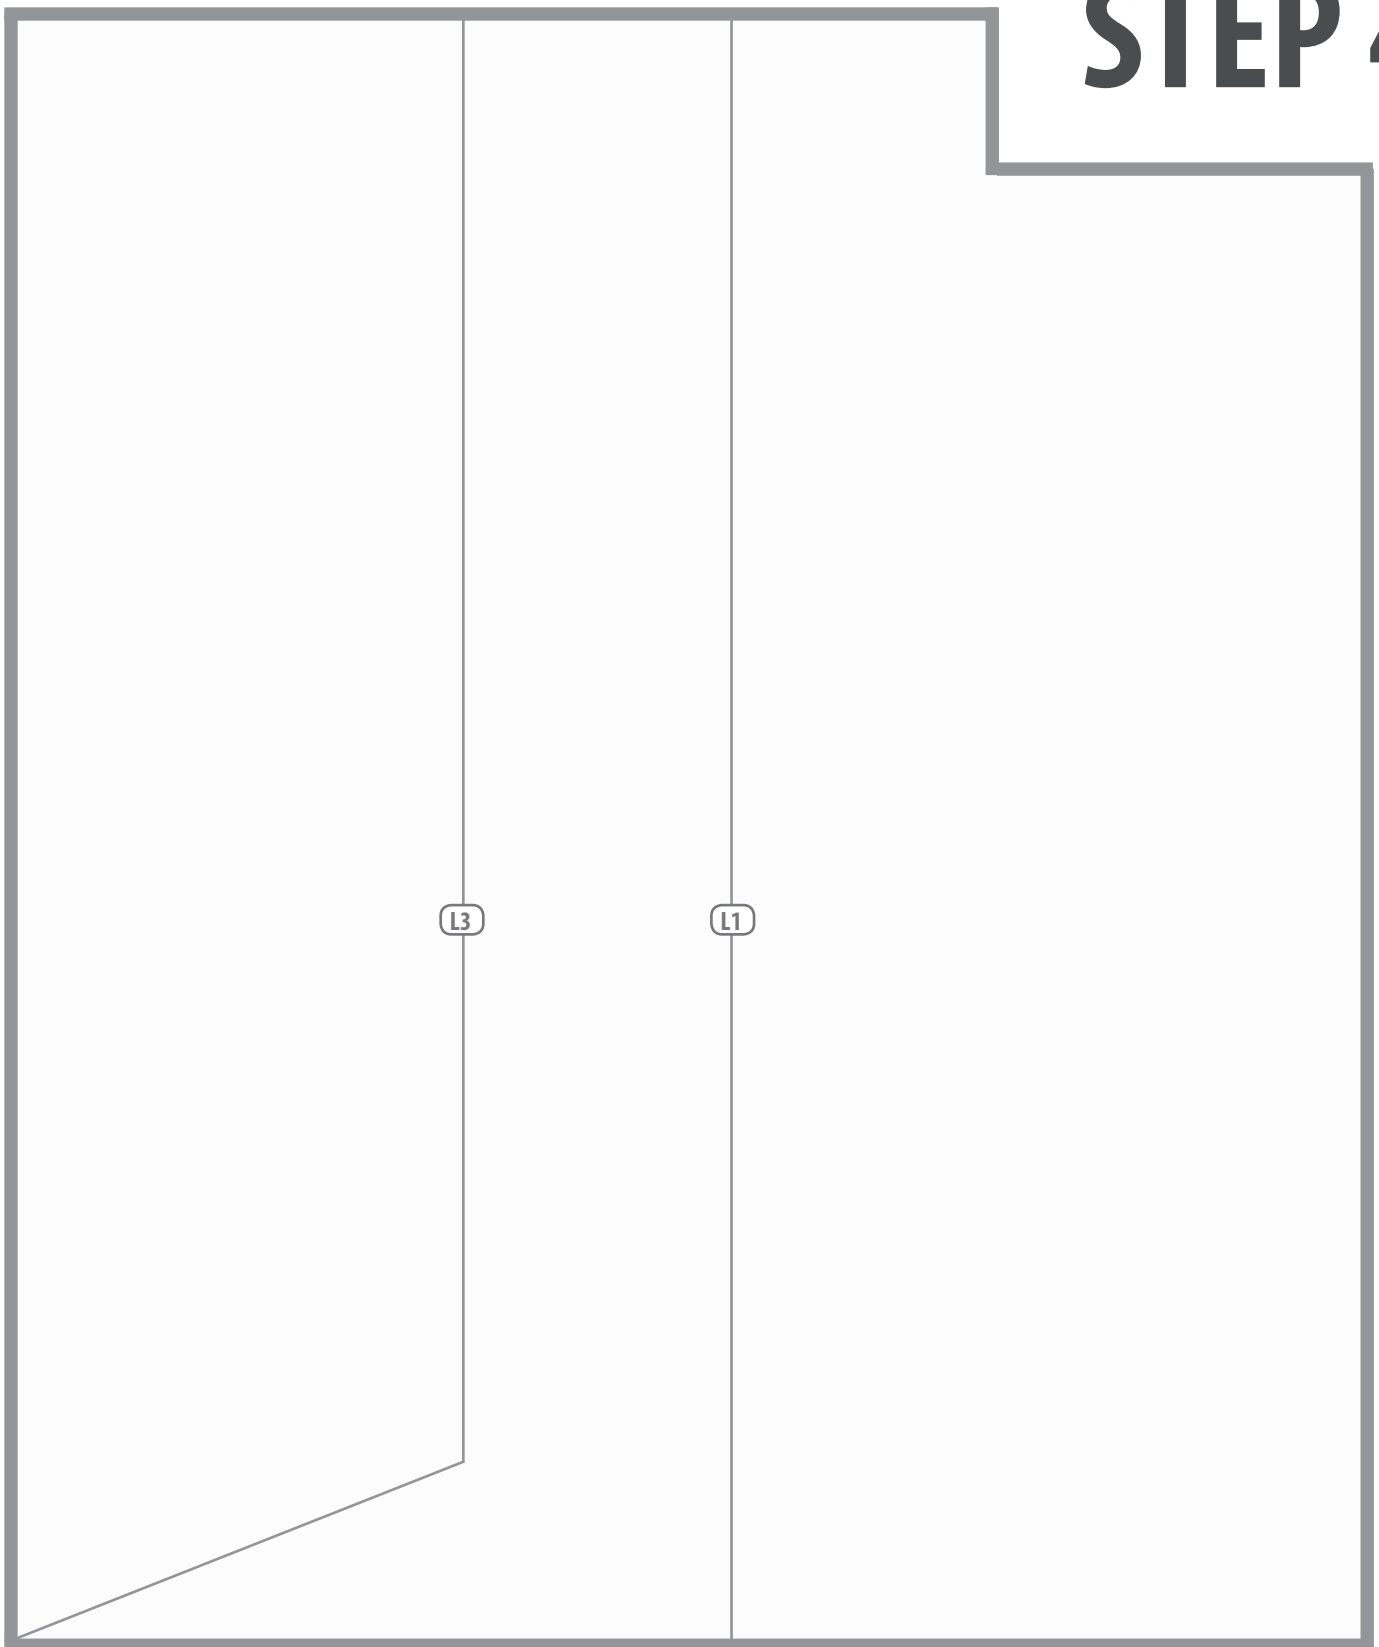

Mark a point at a distance from the left edge equivalent to $\frac{1}{4}$ the height and at a height $\frac{1}{10}$ the height of your wall.
Label that point P1.

STEP 3

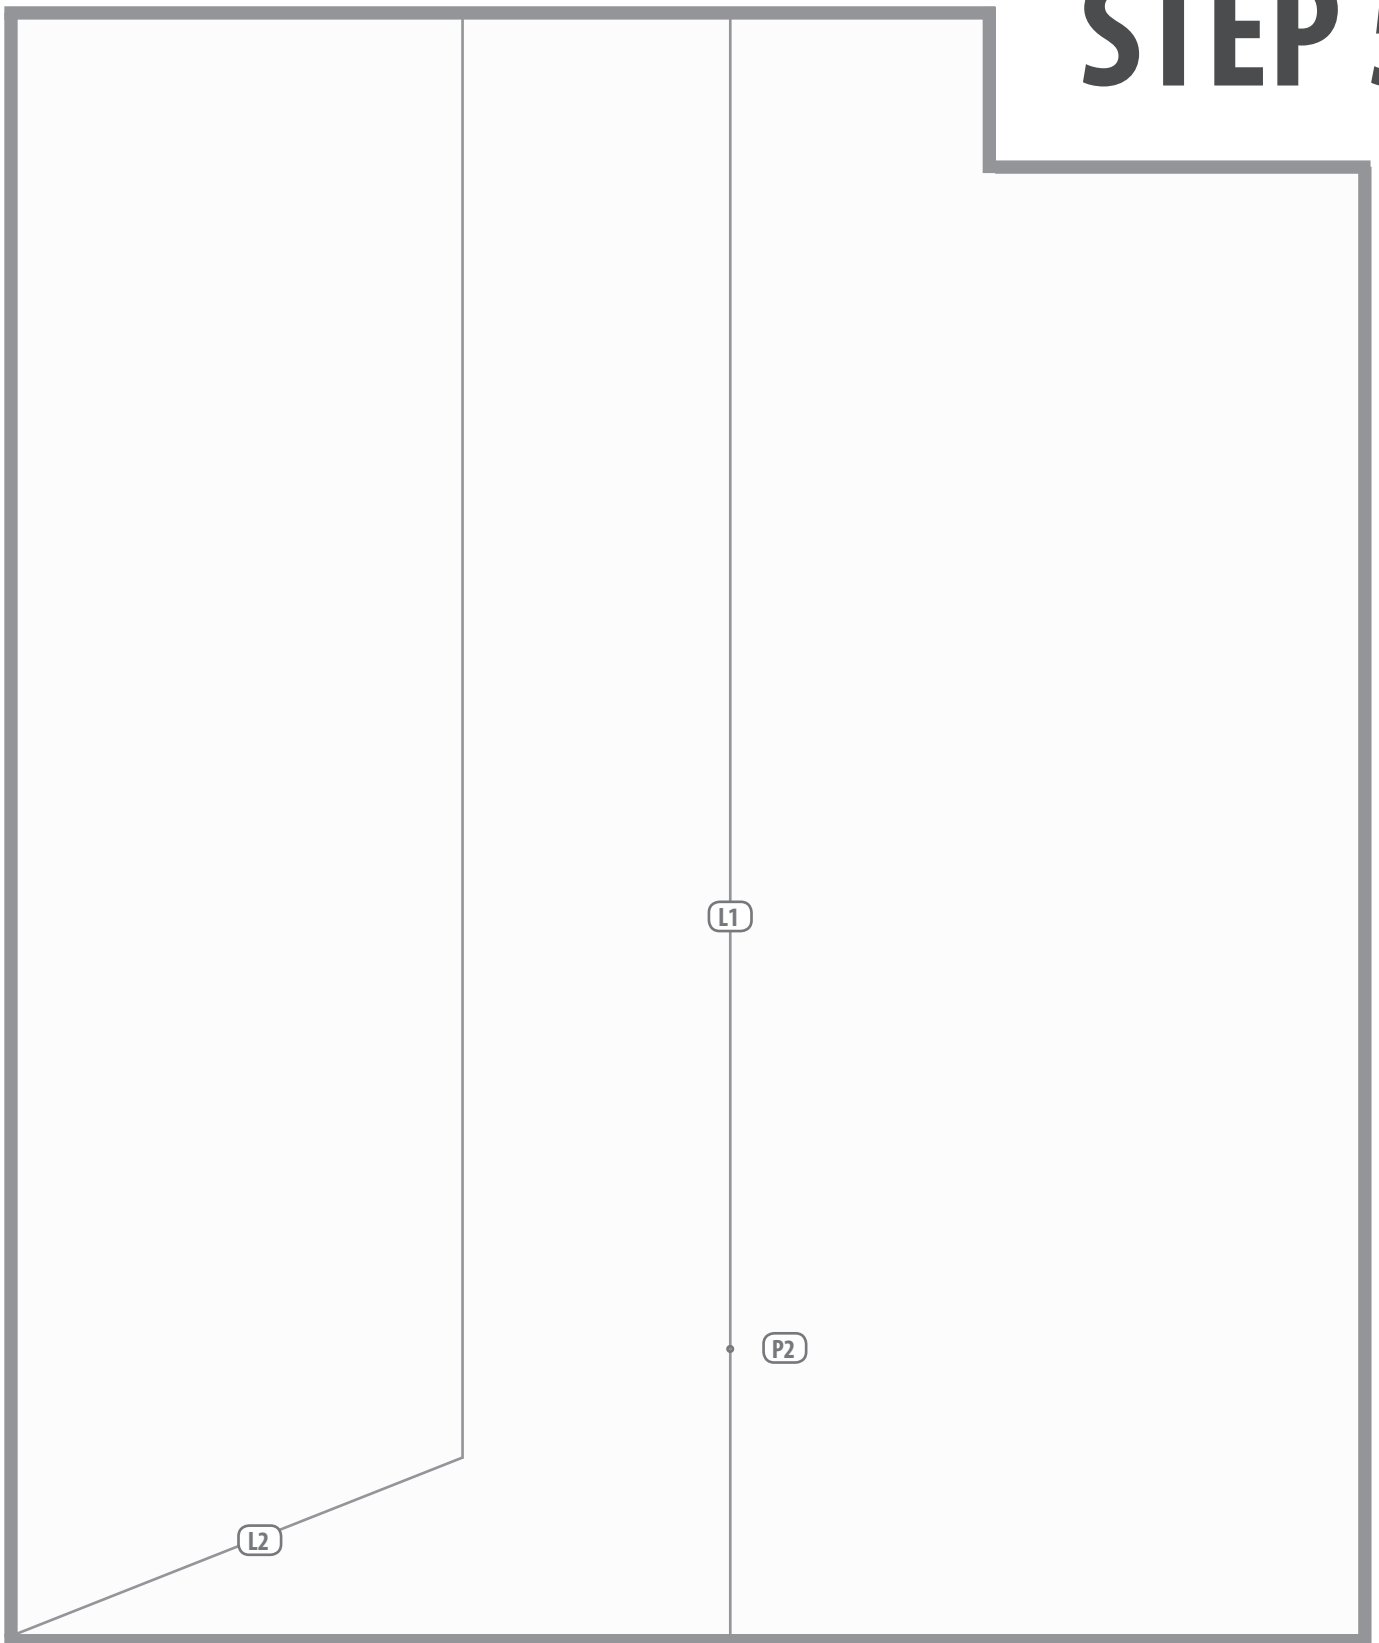

Draw a line from P1 to the bottom left corner of your wall.
Label that line L2.

STEP 4

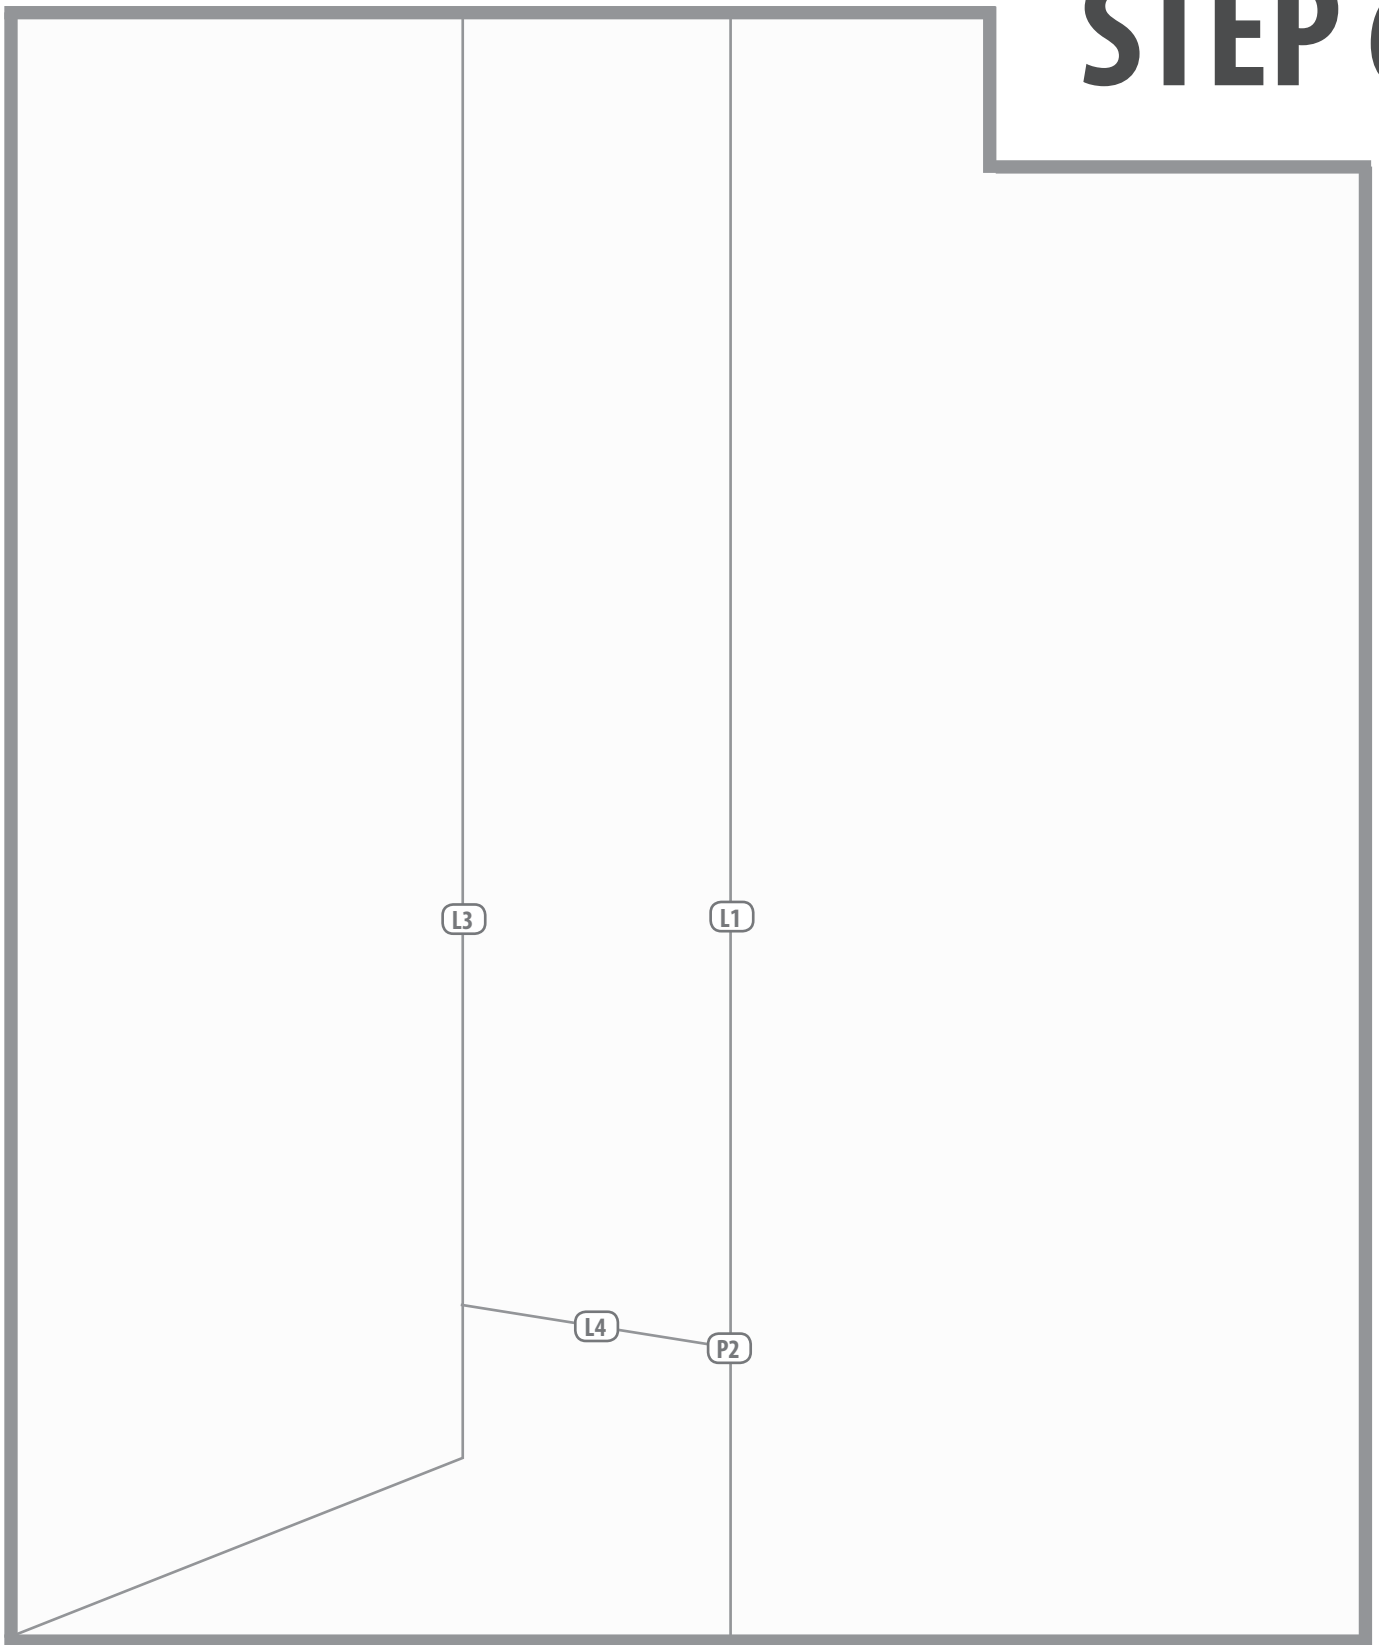

Draw a line from P1 parallel to L1 up to the top of your wall.
Label that line L3.

STEP 5

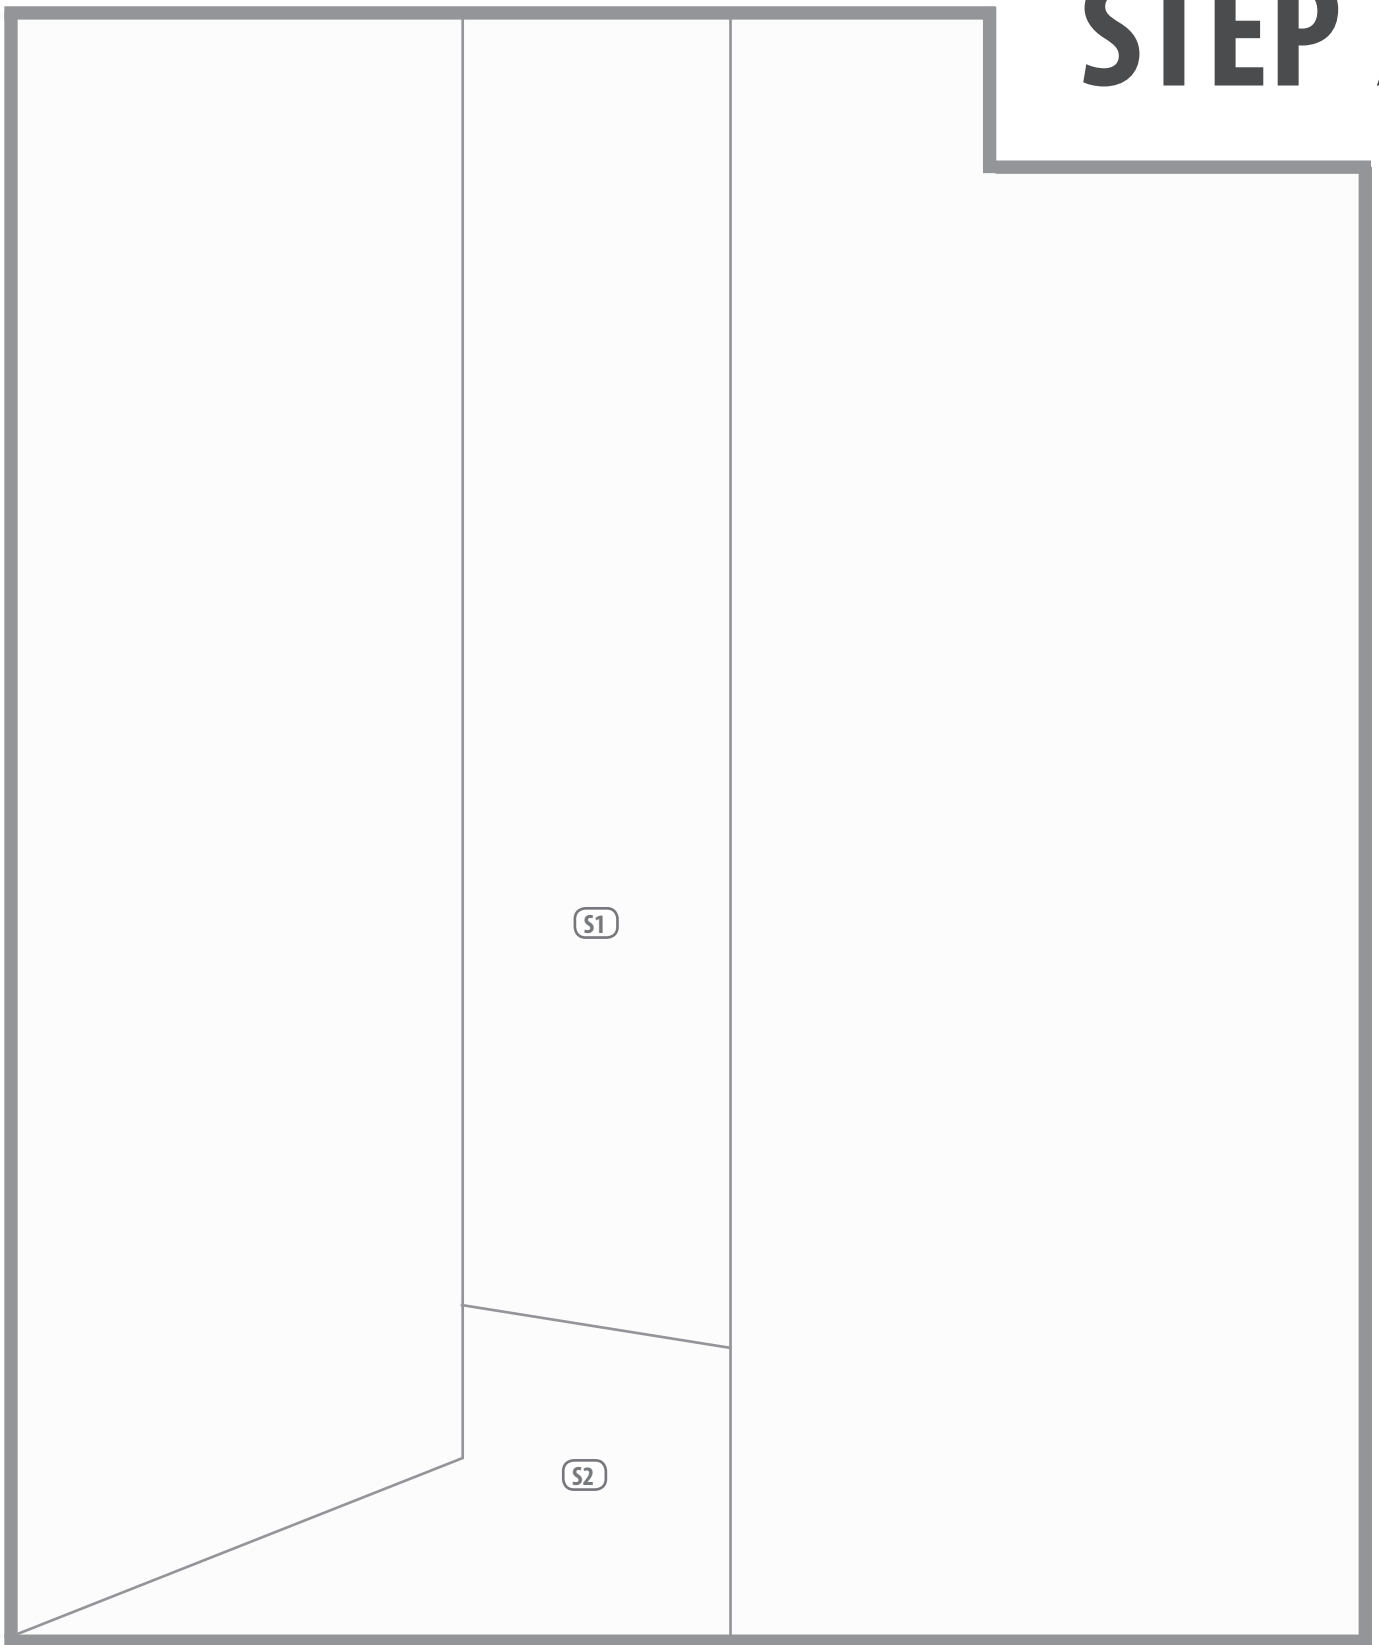

Mark a point on L1 where L2 would meet L1 if L2 continued past P1.
Label that point P2.

STEP 6

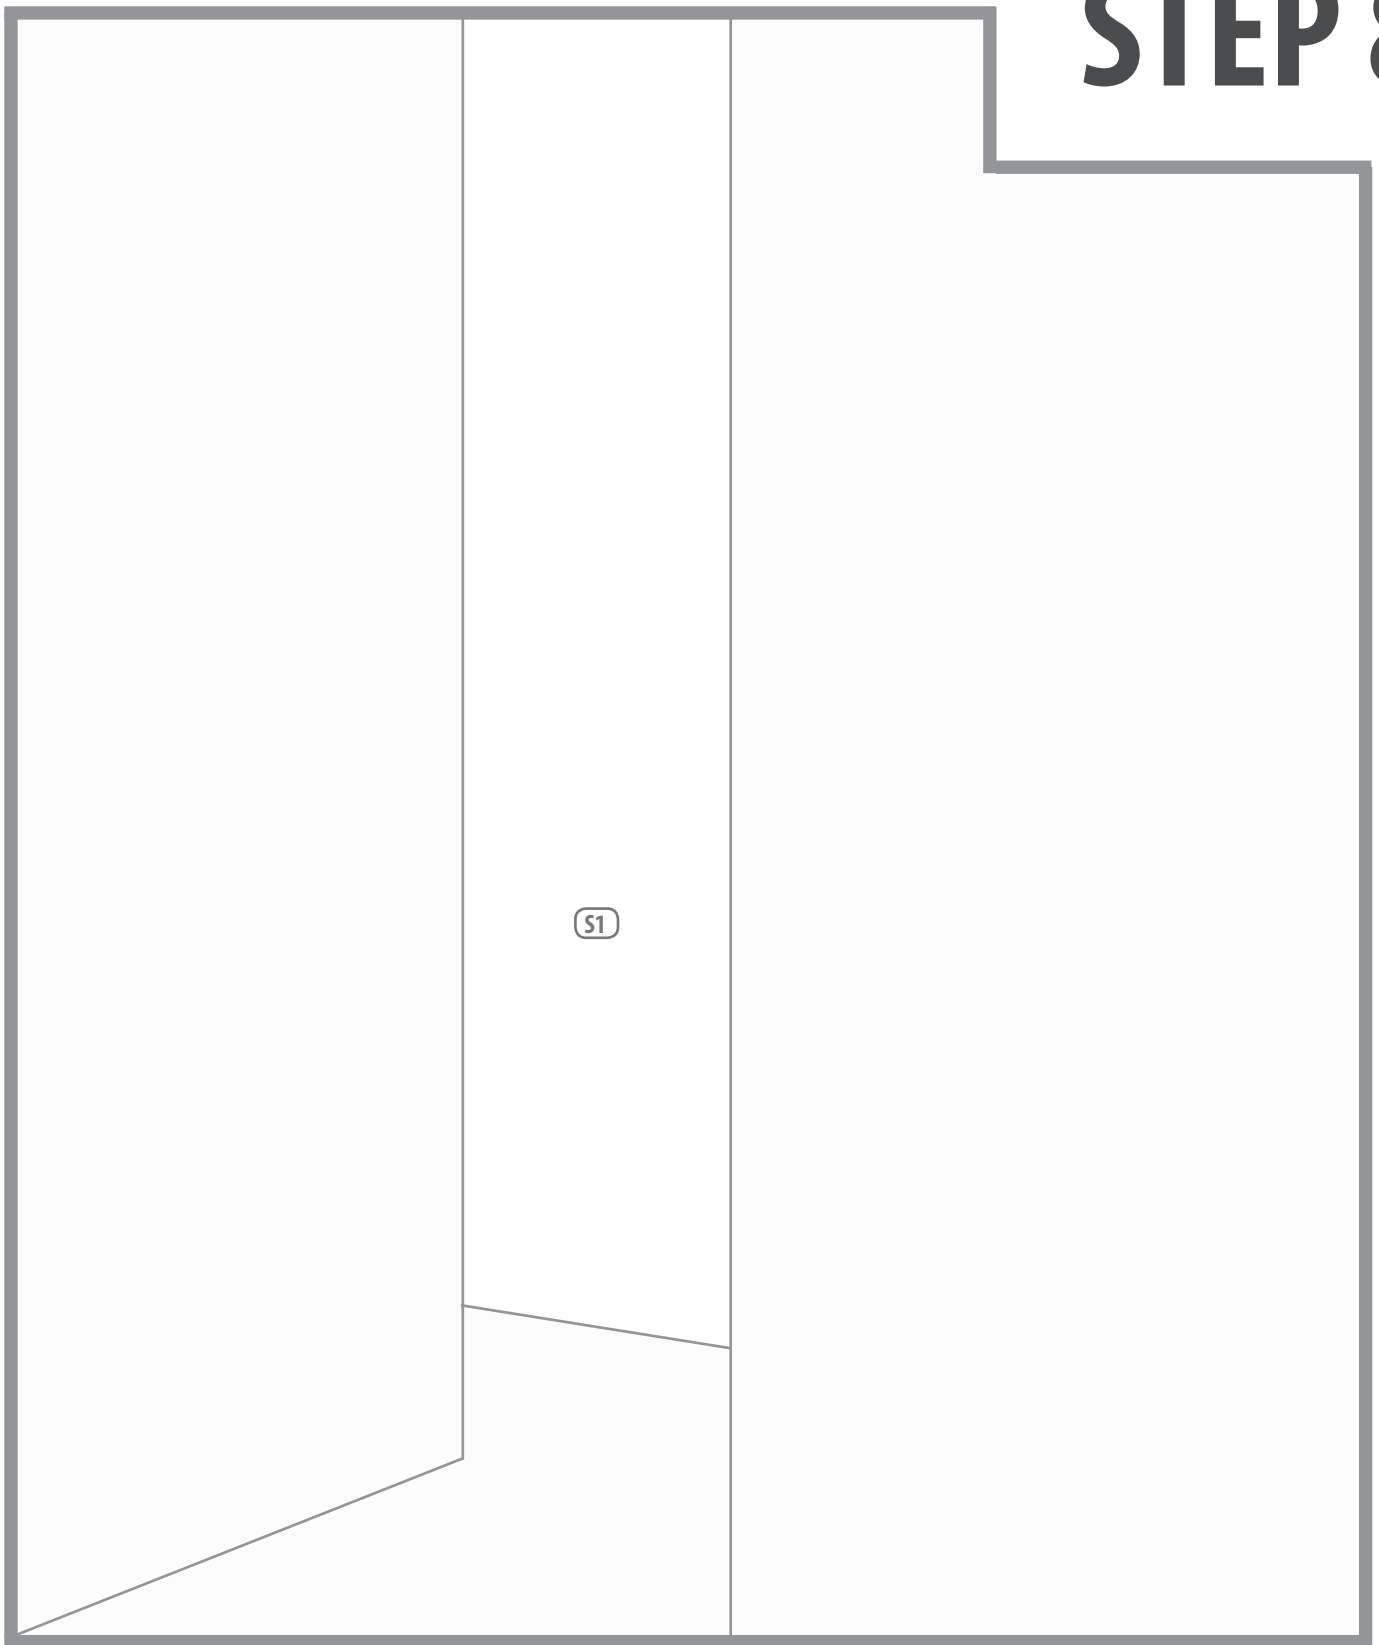

Draw a line from P2 toward L3 that is not parallel to the bottom edge of your wall but that ascends at an angle that is $\frac{1}{3}$ the angle that L2 ascends from the bottom edge of your wall. Label that line L4.

STEP 7

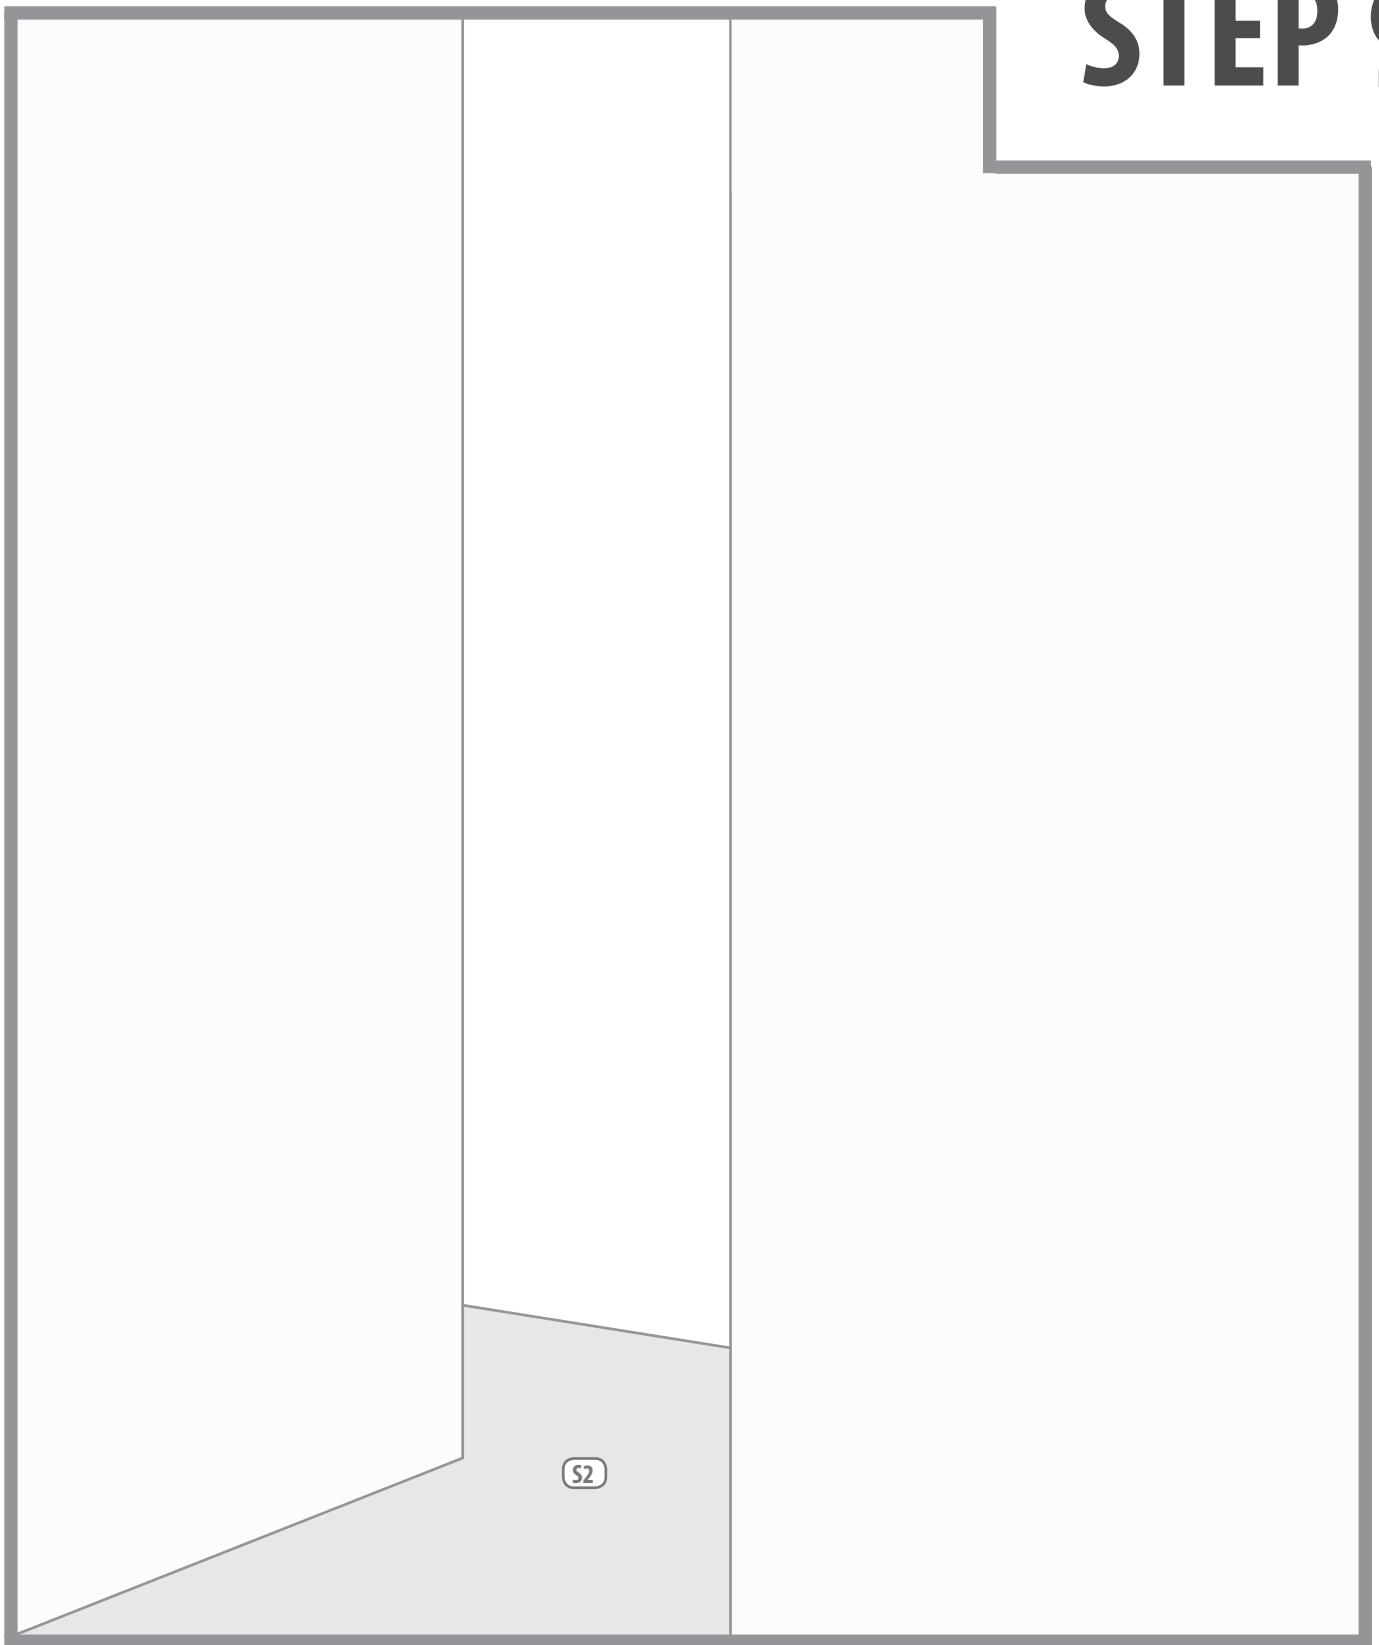

Label the shape made above L4, between L1 and L3, and below the top edge of your wall S1.
Label the shape made below L4, between L1 and L2, and below the top edge of your wall S2.

STEP 8

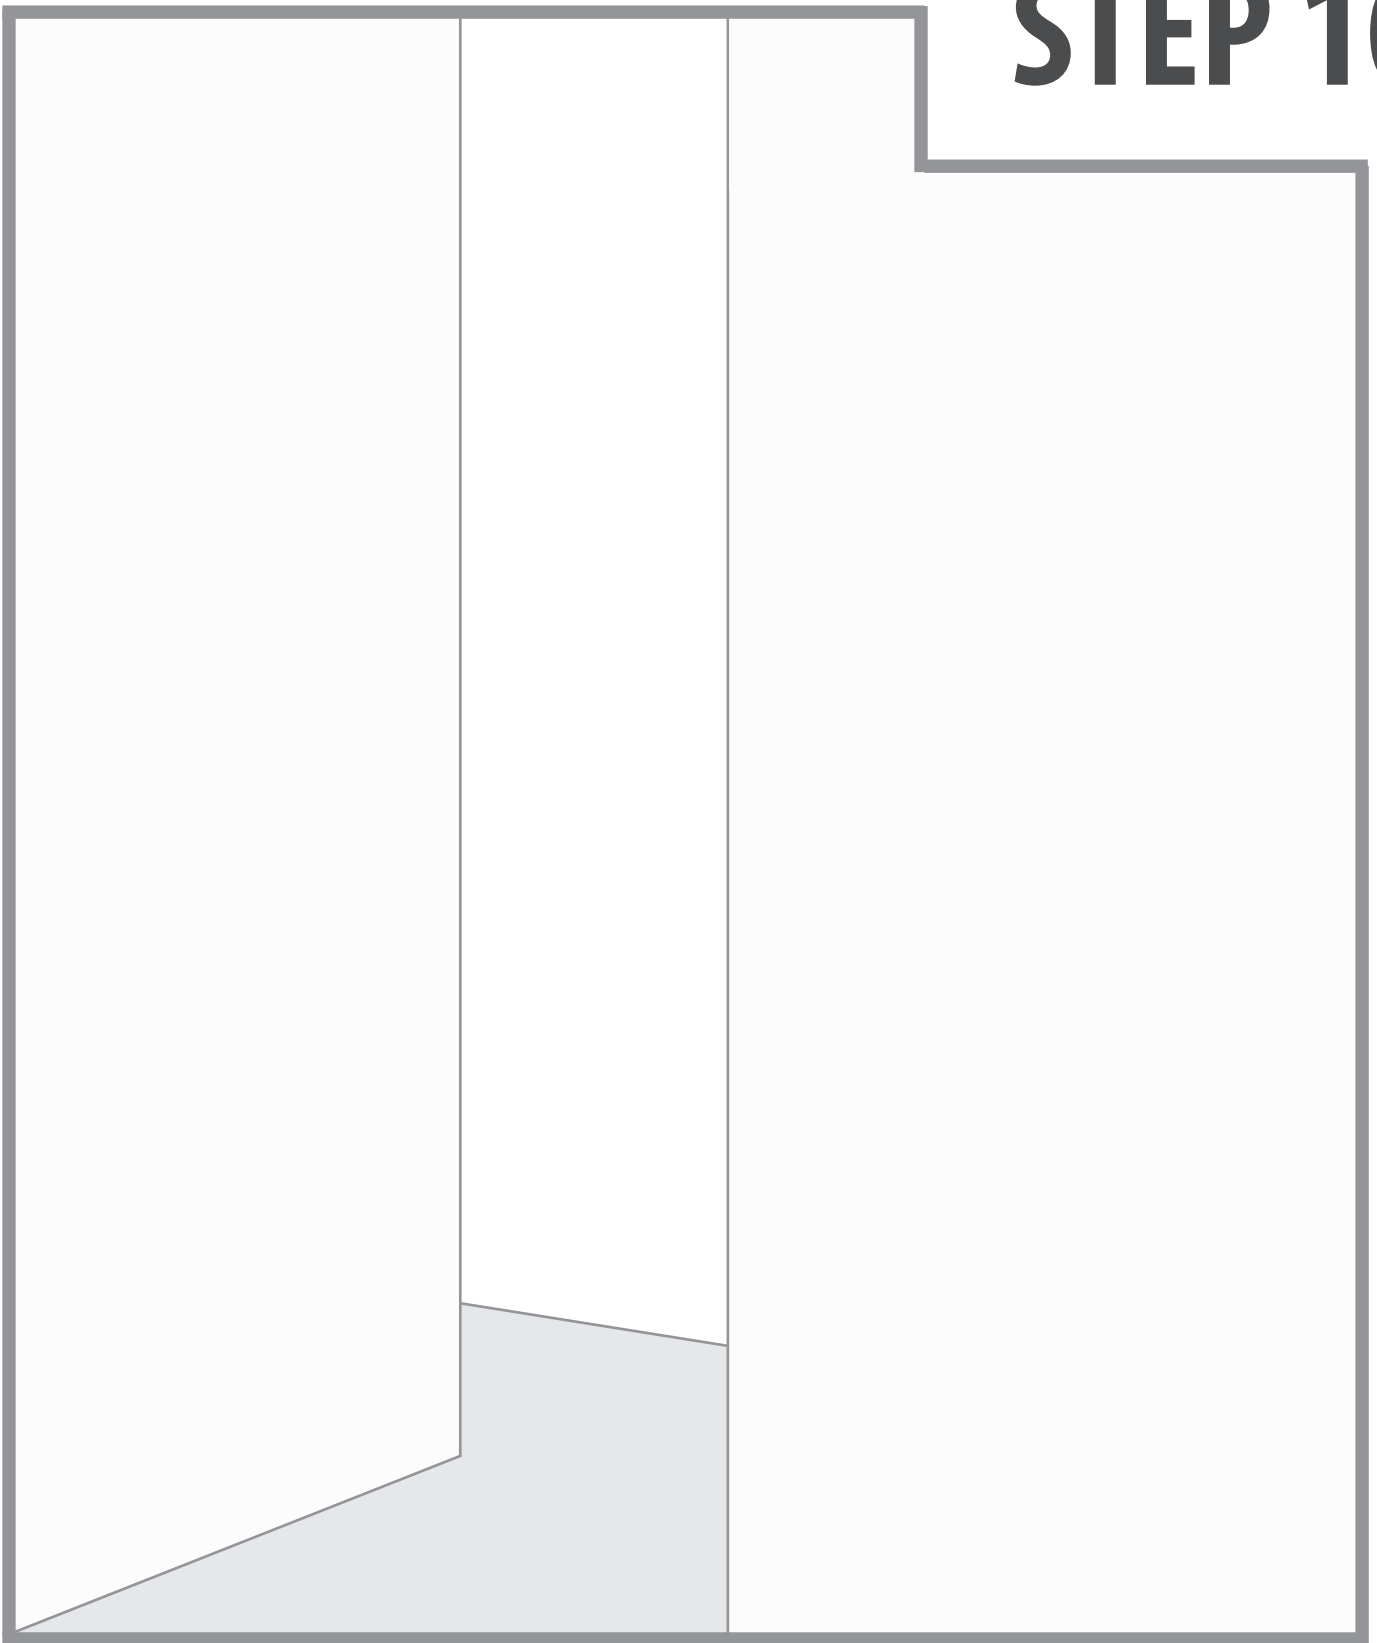

Paint S1 flat white, keeping the edges of your shape sharp using either tape or careful strokes with a small brush.

STEP 9

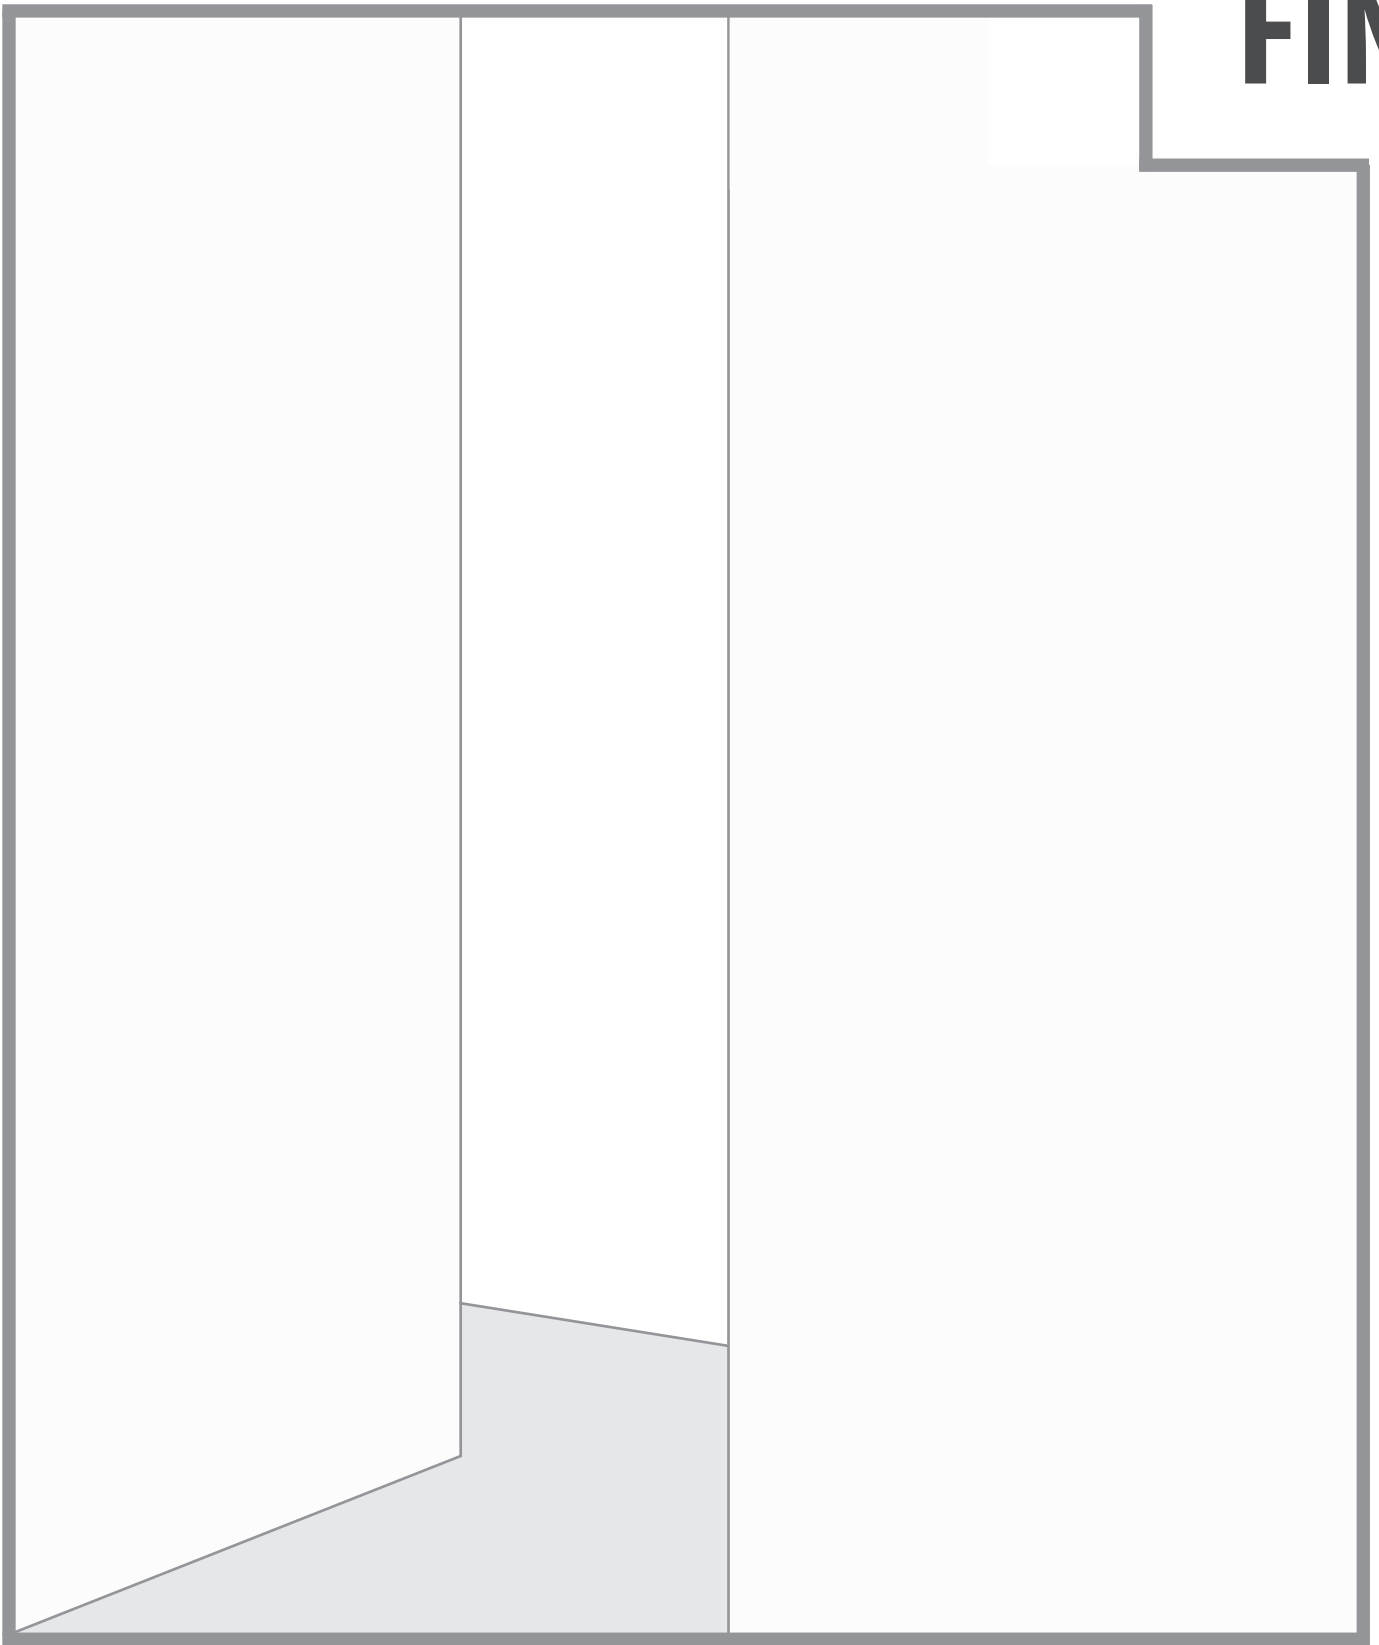

Paint S2 the color of the floor in your space, keeping the edges of your shape sharp.

STEP 10

Using your soft graphite pencil and straight edge, re-trace your pencil lines. Continue your pencil line along the meeting point of all other walls and the floor in your space. Erase or paint over any chalk lines, smudges, fingerprints, or deviation in line with the appropriate color.

FIN

Replace furniture and other objects in your space removed for installation.
